

Weather Reach Signal Service for Rain Bird[®] ET Manager[™]

Rain Bird ET Managers automatically manage watering schedules based on real-time weather conditions. The Weather Reach Signal contains hourly weather data, broadcast through commercial wireless paging carriers to ET Managers. Customers save money and landscapes are healthy because they are watered efficiently.

National ET & Weather

Accurate, real-time, weather data assures ET Managers control irrigation with the best possible information. The Weather Reach Signal includes five hourly climate measurements; Solar Radiation, Wind, Humidity, Temperature and Rainfall. The internationally accepted ASCE Standardized evapotranspiration rate equation requires measurements of each of these conditions on an hourly basis.

The Weather Reach Signal data originates from one of three weather data sources:

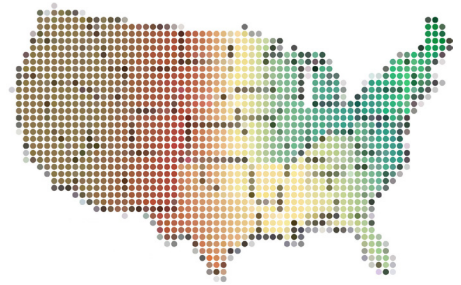

- Campbell Scientific ET Weather Stations.
- Agricultural weather station networks, including: AgriMet, CIMIS, FAWN, Mesonet, etc.
- NOAA - National Oceanic and Atmospheric Administration - US Department of Commerce.

RAIN BIRD[®]

Weather Reach Signal Providers maintain weather station networks as either a commercial or public service to sustain water conservation. There is no subscription cost for the signal provided by public or sponsored providers. A commercial provider subscription is quickly offset by lower water bills, time savings, and healthy landscapes. Use the map to locate a weather station near your property, click on the station to see the detail regarding terms of service.

Irrisoft Weather Reach Signal Service

Irrisoft, Inc. offers Weather Reach Signal Service in most areas of the US at a cost of \$88.00 per year per Rain Bird ET Manager. If service is not shown in your area contact Irrisoft, Inc.

Setup your own account on-line to Activate ET Managers by going to www.weatherreach.com/RainBird or call 435-755-0400.

Water Manager Program - 8 at \$88 then \$8

Water Managers with multiple ET Managers in an area can take advantage of the 8 at \$88 then \$8 program. Once a water manager has a Weather Reach Signal Service Subscription for 8 ET Managers, on the same weather station, the cost for each additional ET Manager is only \$8.00 per year.

Weather Reach Signal Sponsor

Help your community reduce landscape water waste by becoming a Weather Reach Signal Sponsor. By sponsoring the Weather Reach Signal, you make available free, valuable weather data and its benefits to anyone with an ET Manager.

When you sponsor a weather region, Irrisoft broadcasts weather data from a local weather station to ET Manager products as a free service to the community. The sponsorship cost is \$948.00 / year per weather station. As a Weather Signal Sponsor, you will increase marketing exposure and enhance your community image.

Contact Irrisoft for more information at sales@irrisoft.net or call 435-755-0400.
